Mr. Chetan Sayankar

Managing Director/ CEO – S-Cube Mass Transfer Pvt Ltd

Mr. Chetan B. Sayankar is the Managing Director and CEO of S-Cube Mass Transfer Pvt. Ltd., Pune. He is a recognized expert in the Biofuel sector, Oil & Gas, Specialty Chemicals, and other Process Industries. With over 20 years of extensive experience as a consultant, Mr. Chetan has successfully engineered and commissioned more than 25 medium and large-scale manufacturing plants, including facilities for biodiesel, first- and second-generation ethanol, metering skids, and gas recovery systems.

Mr. Chetan holds both a diploma and a bachelor's degree in Chemical Technology. He has profound expertise in process engineering research, business development, and management. As an innovator, he holds a patent for a "Selective Enzyme-Based Process for Biodiesel Manufacturing" and has authored multiple research articles published in international journals and conferences.

With a deep passion for fostering a cleaner and greener planet, Mr. Chetan has built a vast global network of professionals in the field. He established S-Cube Mass Transfer Pvt. Ltd., which provides innovative and sustainable solutions for the process industry, specializing in reducing carbon emissions through advanced heat integration and mass transfer technologies. His organization is dedicated to driving sustainability and efficiency in industrial processes.

Prior to founding S-Cube Mass Transfer Pvt. Ltd., Mr. Chetan successfully launched and managed operations for U.S.-based companies in India, serving as their Operations Head for over five years. Today, S-Cube Mass Transfer Pvt. Ltd. delivers comprehensive solutions in mass transfer technology, catering to industries striving for innovation and environmental responsibility.
